Prepare IMUNES

For Windows/MacOS Users

- As IMUNES does not support Windows, you need to install a Linux/FreeBSD virtual machine.
- VirtualBox is recommended to install the virtual machine.
 - Download VirtualBox (<https://www.virtualbox.org/wiki/Downloads>)
- We have setup the virtual environment, you can download the VM (ubuntu22.ova) and import it in VirtualBox:
 - Download link: <https://epan.shanghaitech.edu.cn/1/9FhZX6>
- Then, install VirtualBox, and import the VM with following steps.

Prepare IMUNES

- Install VirtualBox

1. Execute  VirtualBox-xxxxxxxxxxxxxx

2. 

3. 

4. 

5. 

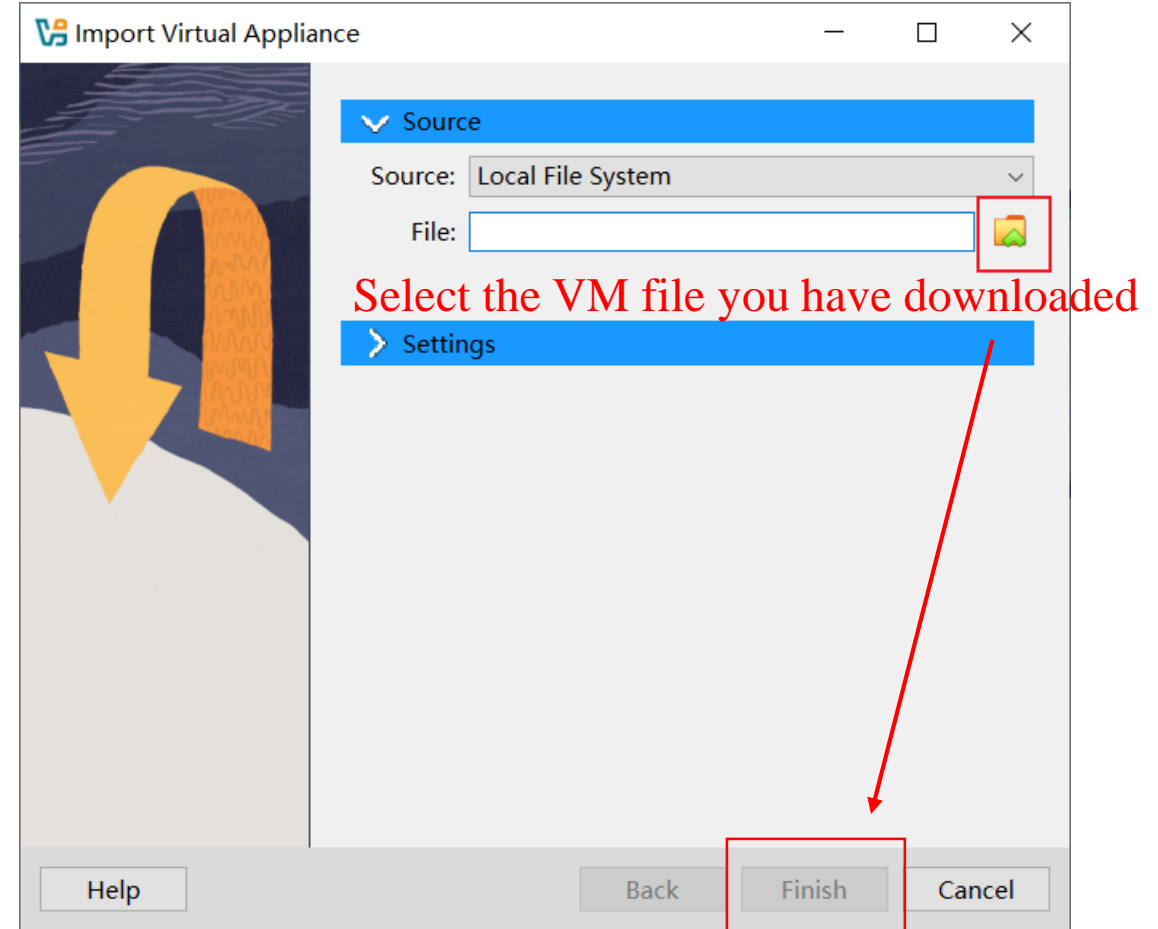

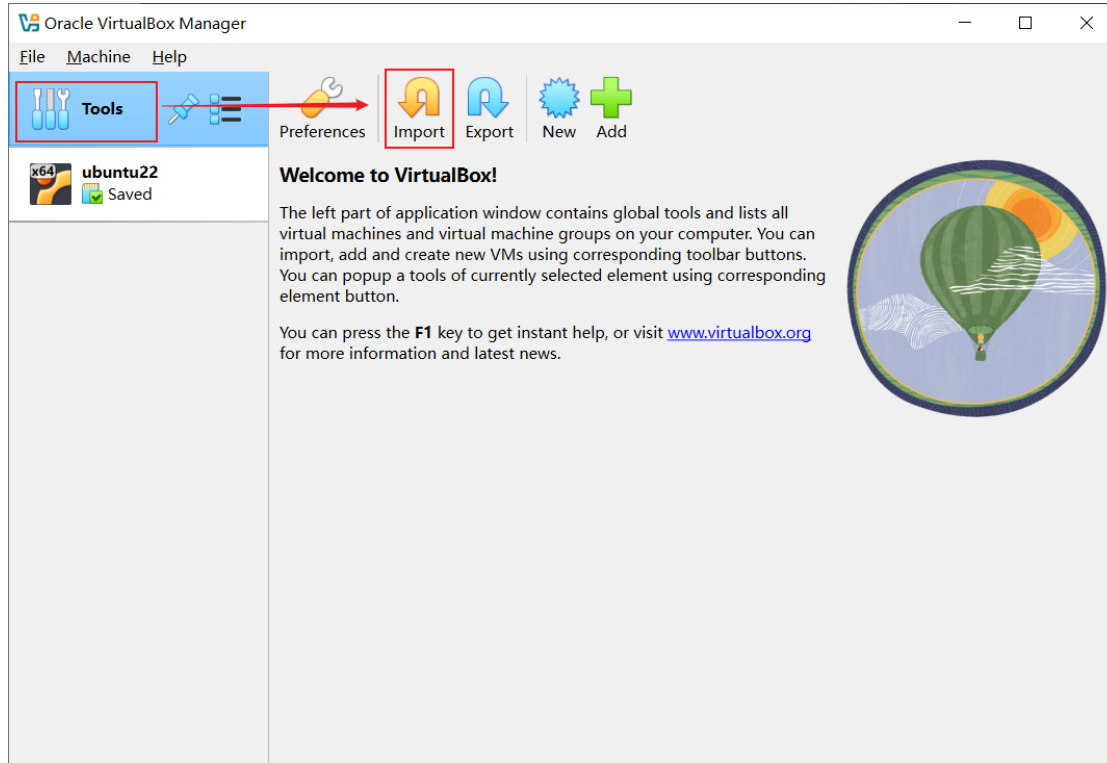

6. 

7. 

8. 

Prepare IMUNES

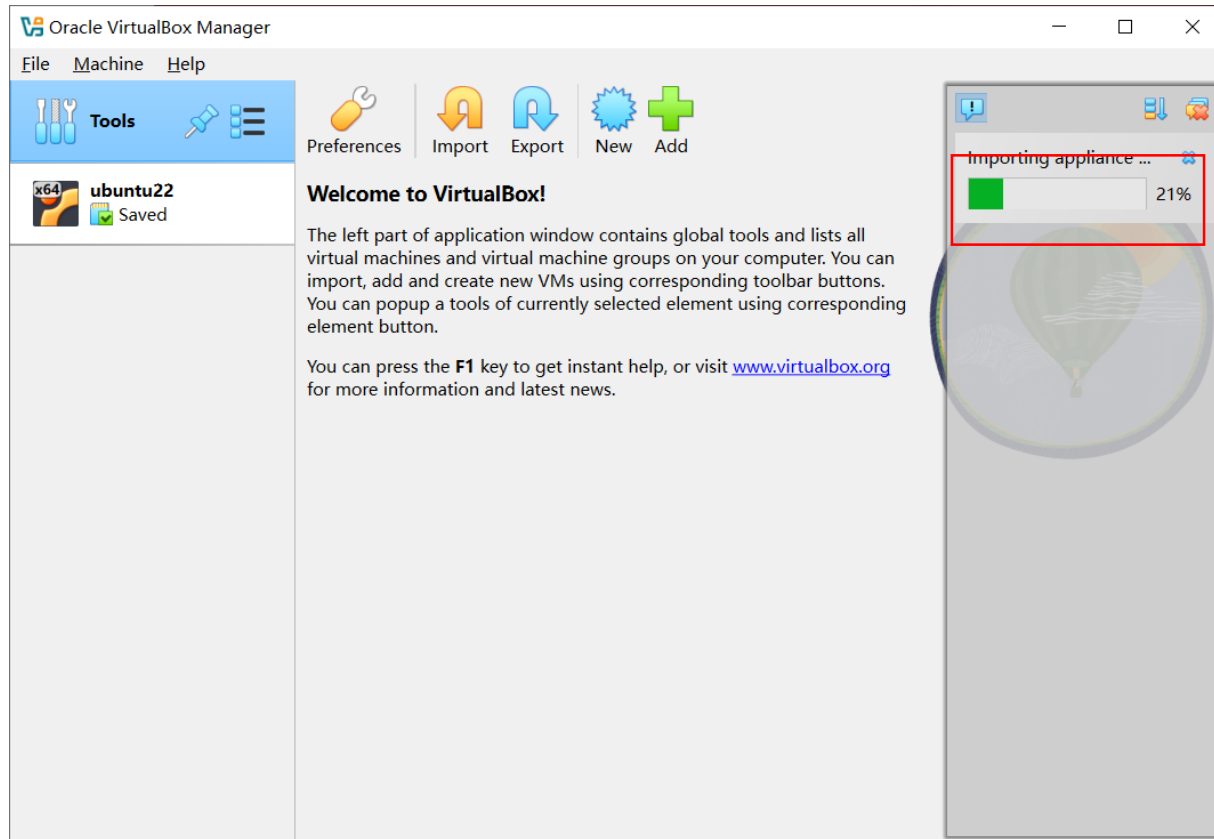

- Import VM

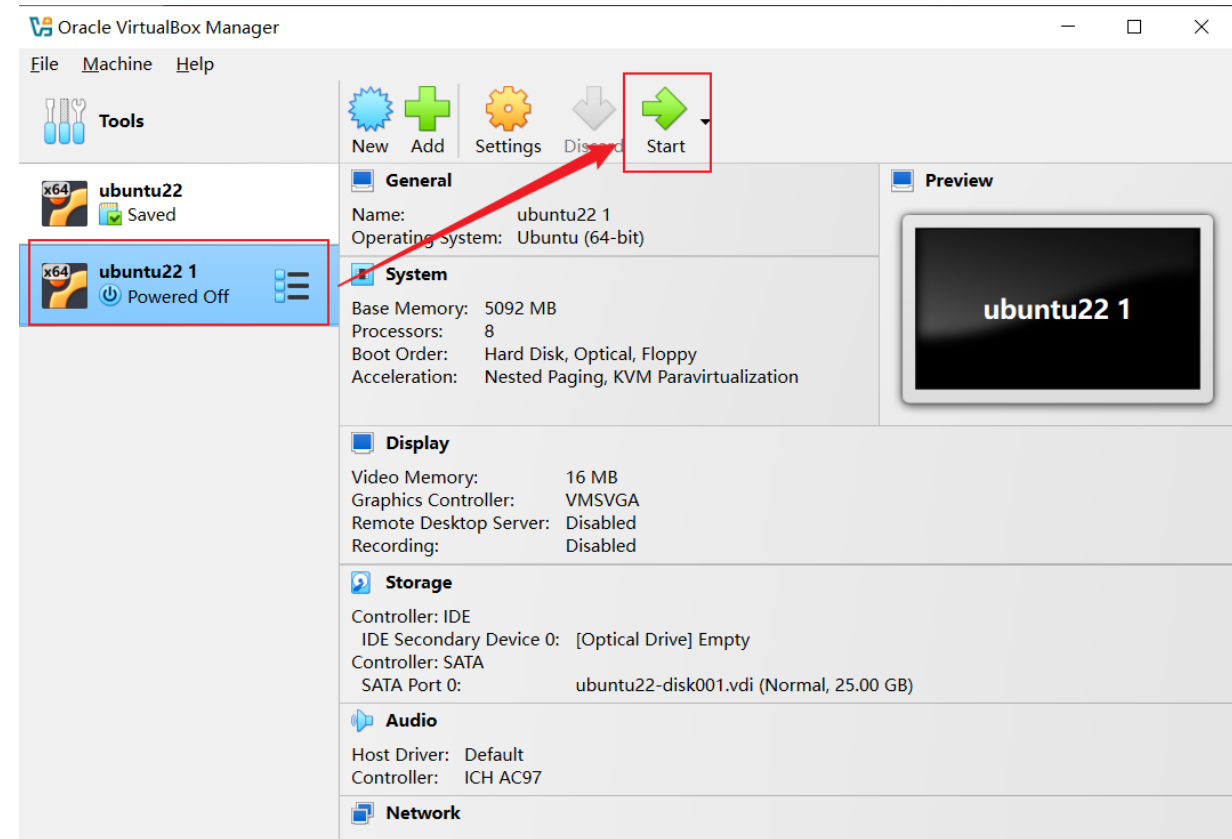

Prepare IMUNES

- Import VM

Wait

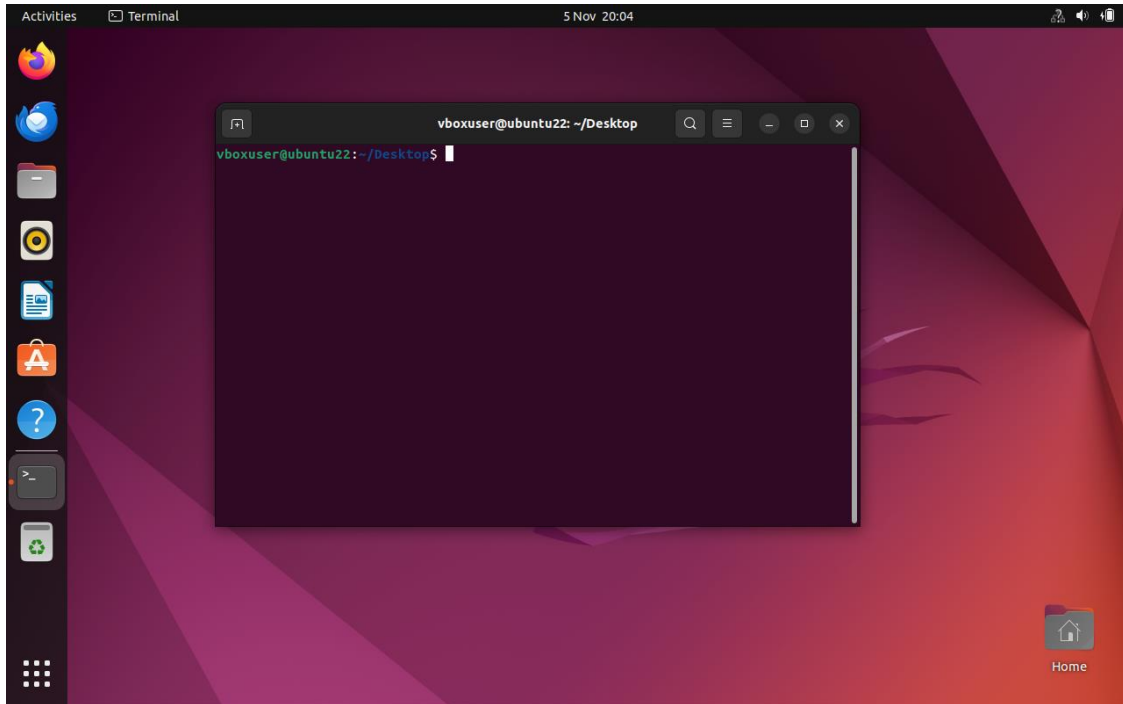

Start

Prepare IMUNES

- Run IMUNES

Login (Password: 1234) and open the terminal

Open IMUNES with command “sudo imunes”
